

MobileFrame Inventory & Asset Tracking Software

Inventory & Asset Tracking Software You Can Count On

Inventory and assets are among the largest figures on the balance sheet, therefore, effective inventory control and asset management are fundamental to ensure the success of any organization. With the increasing number of distribution centers and the globalization of business, the balancing act between having enough (but not too much inventory) and carefully overseeing the acquisition and utilization of assets is a serious challenge.

MobileFrame's Inventory & Asset Tracking Software enables the electronic collection of inventory & asset information and delivers real-time access to critical data to all of the stakeholders within your organization.

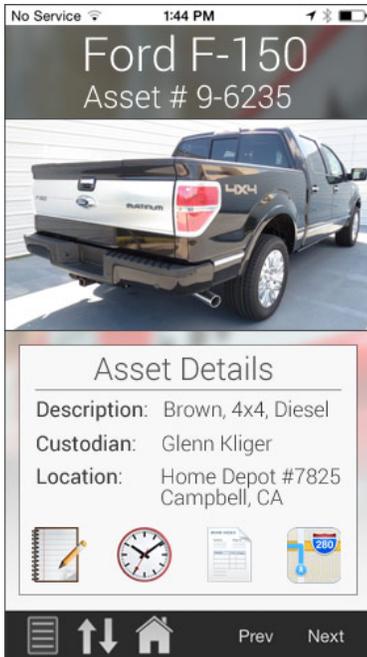

Our solution is a highly scalable, yet configurable, and designed to accommodate years of service even as your business processes change. The entire solution is written on the MobileFrame Platform, so the apps can be easily extended to include new features, all without the time or expense of custom development efforts.

MobileFrame's Platform gives your organization the ability to extend applications into other departments to meet any business requirement. All of our apps are fully customizable and provide the ability to collect rich data including digital photos, barcode scans, RFID data, digital signatures, sketches, voice notes, GPS data and more.

Improve Management Insight

Our fully integrated management web portal allows your management team to obtain critical inventory and asset data from anywhere so they can address issues before they become problems. Some features include:

Inventory Management: records and stores all pertinent inventory data including current inventory levels, inventory location, inventory cost, inventory lookup, etc. The solution generates reports, sends automatic notifications, and can be accessed from anywhere at any time.

Asset Management: tracks and stores all relevant asset information including location, type, description, cost, acquisition date, etc. allowing for easy asset lookup, increased asset utilization, and a higher ROI.

Integration: seamlessly integrates with any Enterprise Resource Planning (ERP), Enterprise Asset Management (EAM), or Computer Aided Facilities Management (CAFM) system, or can be used as a stand-alone enterprise solution.

Management Web Portal & Reporting: provides your team with access to critical information from anywhere, including detailed inventory & asset reporting with charting.

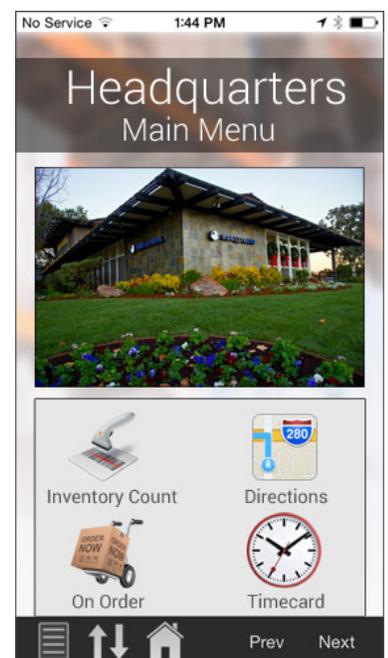

Increase Data Collection Efficiency

Your office, field, and warehouse staff can spend more time on productive tasks because we have eliminated the hassles associated with keeping up on paperwork, endless phone calls and wasted time. Our Inventory & Asset Tracking Solution is extremely powerful, easy-to-use and ensures your staff will always have access to accurate real-time inventory & asset data. Some features include:

Finger Friendly Apps with Gesture Support: the apps have been carefully built for finger-based input and gesture support, not only making staff's lives easier (who hasn't lost a stylus), but also increasing the speed of entry and eliminating mistakes.

Work Offline & Provide Real-time Data: the solution not only allows staff to work offline, but intelligently recognizes when network connectivity becomes available and automatically checks for any updates that might have been missed while in a bad reception area.

Photo, Barcode & RFID Support: a picture is worth a thousand words - staff can view and take pictures of inventory & assets ensuring that they have the correct item, eliminating mistakes and speeding up staff productivity. The solution fully supports barcode scanning and RFID based inputs from any device, eliminating errors from manual data entry.

Other Features & Benefits:

There are simply too many features and benefits to cover them all here, so please visit www.MobileFrame.com and [request a demo](#) if you'd like more information.

Support for Any Device: We support any mix of hundreds of devices ranging from smartphones (iPhone, Android, etc.) to ruggedized handhelds to laptops and tablets (iPads, Android Tablets, and Windows 8 Devices)

Work Offline & Provide Reliable Data: your business cannot afford to stop just because cellular service in certain areas is unreliable. Our Inventory & Asset tracking Solution operates in both connected and disconnected (offline) modes, allowing your staff to finish their work even when they lose network connectivity.

Better Data Leads to Better Decisions: mobile, web, and desktop based inventory & asset solutions provide organizations with enhanced workforce productivity, increased inventory management efficiency, improved asset utilization, and accurate financial reporting.

Fully integrate your Inventory & Asset Tracking Software for even greater ROI

While our inventory and asset tracking software works great on its own, it has also been designed to integrate seamlessly with our other solutions such as our Field Service solution (work orders, repairs, schedule/dispatch, preventative maintenance, etc) to maximize operational efficiency and provide even greater ROI.

MobileFrame is the leading enterprise mobility platform, with over 14 years in the industry and several thousand successful deployments. Our platform is a complete enterprise mobility solution with all the tools and features that a successful mobile solution requires, including: rapid application development, mobile device management, project administration, GPS tracking, and an Integration Wizard. MobileFrame is an integrated software development lifecycle (SDLC) platform to design, develop, test, deploy and manage multi-channel applications. We also offer several ready-to-run apps that enable customers to quickly mobilize their business.
